#### About the Conference

COVID-19 pandemic is the worst catastrophe that has hit the entire world. The impact on India is largely disruptive in terms of economic activity and loss of human lives. Because of this pandemic, total reported deaths in India are 4,87,719 and in the world they are 55,86,044 as on 17/01/2022 and the numbers are still counting. Negative impact of COVID-19 pandemic on Indian economy includes- decrease in GDP, sharp rise in unemployment, negative impact on supply chains, decrease in government income, collapse of tourism industry, reduced consumer activities, plunge in fuel consumption, etc. According to CRISIL, this is perhaps India's worst recession since independence. India may needs decades to set right the catastrophic impacts caused by this pandemic. For this, there is an acute necessity of holding a comprehensive discussion especially among researchers, students, academicians etc.
